

COLOSTRO

ENERGY + IMMUNITY

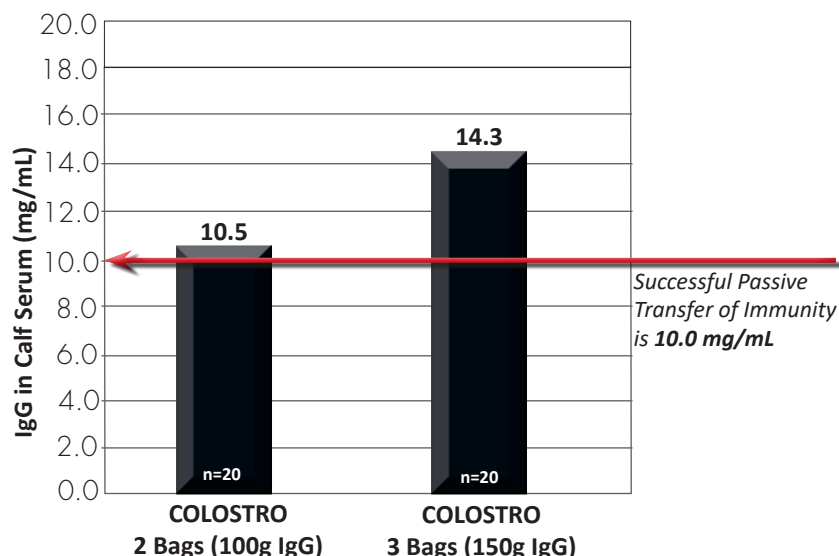

INDICATIONS

- » COLOSTRO provides a unique balance of both immunity and energy, meeting the needs of most calves.
- » COLOSTRO is a natural bovine colostrum powder that is rich in colostrum fat, a critical early source of energy for newborn calves.
- » COLOSTRO may be used to supplement or completely replace maternal colostrum.
- » COLOSTRO is made only from natural, premium quality bovine colostrum. It is an excellent source of IgG (over 85% in the form of IgG1), colostrum fat, growth factors, and nutrients needed to improve calf survival, health, growth, and long term performance. COLOSTRO is not a manufactured formula based on blood serum, whey, eggs, vegetable fats or other ingredients not naturally found in colostrum.

FEEDING RECOMMENDATIONS

- » The Dairy Calf and Heifer Association recommends feeding "colostrum equaling 10% of body weight [about 4 quarts for most Holstein calves] in the first 2 hours of life with target serum IgG of >10 mg/mL and total protein of >5.2 g/dL."
- » These levels can be achieved when completely replacing maternal colostrum with COLOSTRO at the recommended levels below.
- » To achieve a replacement dose, feed a minimum of 100g IgG and newer industry standards suggest 150-200g IgG for optimal calf performance.
- » If supplementing, feed a minimum of 50-60g IgG in addition to sufficient maternal colostrum to target a similar overall mass of IgG. If maternal colostrum is very poor quality, supplement with 100-120g IgG in addition to maternal colostrum.

Average passive transfer levels achieved after completely replacing maternal colostrum with COLOSTRO

TYPICAL ANALYSIS (PER BAG)	
Bovine IgG	(50 g) 21%
Crude Protein	48%
Crude Fat	(50 g) 22%
Reconstituted Volume	0.9 L

INGREDIENTS	
Bovine Colostrum	

IMPORTANT PRODUCT FACTS	
UPC Code	05731611722
Quantity Per Bag	235 grams
Quantity Per Case	25 bags
Quantity Per Pallet	48 cases or 1200 bags

To completely replace maternal colostrum:
Choose the feeding level that achieves the desired levels of immunity for your calves.

Feed 2-3 bags of COLOSTRO

2 bag	= 100 g IgG
3 bags	= 150 g IgG

To supplement maternal colostrum:
Feed in addition to available maternal colostrum.

Feed at least 1 bag of COLOSTRO

1 bag	= 50 g IgG
2 bags	= 100 g IgG
